

Seroprevalence in at-risk populations									Blood donor screening									Vaccine efficacy									Knowledge, attitudes & practices (KAP) / prevention			
																		Vaccination coverage / newborns			Educational intervention effectiveness / prevention				Epidemiological interview efficacy / screening correlation		HBV vaccine response in HIV patients / associated factors			
Seroprevalence in general population						Blood donor screening / associated factors						General epidemiology						Immunization coverage		Knowledge & associated factors among students		Knowledge & attitudes (KAP)		Knowledge & attitudes / dentistry graduates		Knowledge & attitudes / dentistry students		Knowledge & attitudes / medical interns		
																		Immunization in healthcare workers / seroprotection		Knowledge & attitudes among medical interns / factors		Knowledge level / nursing students		Knowledge, attitudes & practices		Knowledge, attitudes & practices (KAP)		Knowledge, attitudes & practices (KAP) / risk perception		
Blood donor screening / marker prevalence			Molecular epidemiology			Risk factors			Seroprevalence in at-risk populations / vertical transmission			Seroprevalence in healthcare workers			Immunization in indigenous communities		Knowledge & immunization coverage / associated factors		Neonatal vaccination / nursing intervention		Preventive methods efficacy / associated factors		Seroprotection / vaccine efficacy		Vaccination adherence / medical interns					
															Immunogenic response / predictive factors		Knowledge & practices / intervention assessment		Occupational risk		Vaccination adherence / pediatric population		Vaccination impact / HBV & HDV prevalence		Vaccination impact / hepatopathy mortality		Vaccination impact / indigenous communities			
Knowledge & attitudes		Blood donor screening / anti-hbc prevalence		Clinical & epidemiological profile in pregnant women		Donor screening		Donor screening / economic impact		Epidemiological & clinical profile		Epidemiological profile / adult patients		Epidemiological profile / risk factors		HBV & HDV seroepidemiology / indigenous communities														
		Blood donor screening / hepatitis b & c seroprevalence		HBV-HDV coinfection in indigenous populations		Mortality		Occupational risk		Population seroprevalence / coinfection		Prevalence & associated factors / indigenous communities		Prevalence & associated factors / intellectual disability		Prevalence in blood donors														
Seroprevalence in at-risk populations / HIV coinfection		Blood donor screening / infectious markers		HBV-HIV coinfection / associated factors		Prevalence in donors / associated factors		Prevalence in pregnant women / prenatal screening		Prevalence in pregnant women / serological markers		Public policy & orphanhood / socioeconomic impact		Risk factors / associated factors		Risk factors / police personnel														
		Blood donor screening / marker incidence		Health policy / interculturality		Prevalence in household contacts		Risk factors / prison population		Risk factors in hemodialysis		Seropositivity in donors / demographic factors		Seropositivity in donors / epidemiological factors		Seroprevalence & risk factors / native communities														
Seroprevalence in blood donors		Blood donor screening / risk factors		Hepatocellular carcinoma incidence / associated factors		Prevalence in indigenous populations / mntses ethnicity		Risk factors / seroprevalence in at-risk populations		Seroprevalence in at-risk populations / STIs		Seroprevalence in donors / anti-hbc marker		Seroprevalence in donors / associated factors		Seroprevalence in general population / associated factors														
		Blood donor screening / seropositivity		HIV-HBV-HCV coinfection		Prevalence in key populations (MSM & trans women)		Risk factors in blood donors / anti-core antibody		Seroprevalence in blood bank		Seroprevalence in pregnant women / sociodemographic factors		Seroreactivity & associated factors in donors		Seroreactivity in blood donors / infectious pathologies														
Blood bank donor screening		Case incidence & reporting / epidemiological profile		Infectious markers in donors / seropositivity prevalence		Prevalence in occupational groups		Risk factors in healthcare workers		Seroprevalence in blood donors / serological markers		Seroprevalence in university students		Transmission mechanisms		Viral hepatitis seroepidemiology / population prevalence														
																		Etiology / clinical complications				Laboratory diagnosis				Laboratory diagnosis		Molecular biology & genotypes		
Clinical evolution / complications				Clinical evolution				Clinical evolution / prognosis				Clinical-epidemiological features				Clinical evolution				Diagnostic methods validation / analytical precision										
Treatment & clinical management				Cost-benefit analysis / health economics				Hepatocellular carcinoma & pregnancy / complications				Pregnant patient management with HBV / vertical prevention				HBV genotyping / molecular biology				HBV mutations / pre-core region										
																HBV genotyping / phylogenetic analysis				NAT testing efficacy / early detection										
Alternative treatments / in vitro studies				Extrahepatic manifestations / paraneoplastic syndrome				Treatment cost-effectiveness / antivirals				Vertical transmission / pregnant population				Pediatric follow-up / care barriers
